

Search locally first.

Quickly search your 'usual suspects' with CSIpix Case AFIS.

This is a great tool for fingerprint examiners that you can install right on your computer. CSIpix Case AFIS allows you to copy prints to a directory and search without the need for a database.

Ideal for quick searches of:

- Suspects
- Eliminations
- Victims

Flexible search capabilities:

- 360-degree search or restrict angles
- With or without level 1 info
- Search with as few as 5 minutia points
- Effective for ten-print cards, palms, fingerprints, latents, etc.

Quick and careful comparisons:

- Compare 1 latent to N knowns
- Compare 1 latent to N latents
- Compare 1 known to N latents

System Requirements:

- Windows 10 & 11

Save time when searching for latent print matches with Case AFIS.

"CSIpix Case AFIS provides a great way to streamline the comparison workflow. Latents can be searched against a group of candidates the examiner chooses, or an individual can be compared against all latents in a specific case. It can also be used to reduce missed IDs as a quality assurance step after comparisons"

– Owen McDonnell, CLPE, MO Forensics LLC
